

FIGHTING BREAST CANCER FAST....

9 day turn-around from diagnosis to treatment

In the next 24 hours, 53 Australian women will hear the words “You have breast cancer”. Here are five ways The Strathfield Breast Centre, located at Strathfield Private Hospital, is providing connected, comprehensive and compassionate care.

- 1** The Strathfield Breast Centre (TSBC) is a one-stop shop that offers imaging through to surgery, genetic counselling, radiation and oncology consulting and reconstructive surgery.
- 2** We offer cutting-edge 3D breast imaging – for peace of mind when you need it most. 3D Tomosynthesis provides 40% better tumour detection rates, as well as fewer false alarms and less blurring.
- 3** TSBC also has pathology and imaging on site and provides same-day service for urgent diagnostic biopsies. Turn-around time from diagnosis to treatment is **nine days** on average.
- 4** We have a multidisciplinary team of specialist breast surgeons, physicians and dedicated specialist breast care nurses on site - all providing rapid assessment of breast symptoms and long-term follow-up care.
- 5** TSBC sees 350 new breast cancer patients every year. More than 8000 women have trusted TSBC with the management of their breast cancer and countless others have received assistance for breast pathology services.

Did you know?

TSBC now offers Oncotype DX testing – which provides information about the likelihood of recurrence (low, intermediate or high). This helps determine the likelihood patients may benefit from chemotherapy in addition to standard hormonal therapy.

Our Chief Medical Officers (CMOs) cover intensive care, coronary care and ward areas 24/7.
