Facilities and Services at Strathfield Private Hospital

Cardiac Catheter Laboratory

Our cardiovascular unit is supported by a full range of on-site services including a catheter laboratory and a hybrid theatre. This cardiac catheter suite features sophisticated automated digital medical imaging equipment and can perform the latest tests and procedures in the diagnosis and treatment of heart disease and cardiac arrhythmias.

Intensive Care Unit

Our 6 bed Intensive Care Unit is accredited with the College of Intensive Care Medicine and provides highly specialised care for patients who require intensive nursing care and advanced respiratory, cardiac and renal support therapies. Our dedicated team of 6 Intensive Care Consultants and specialised nurses provide 24 hour care. We also have a 4 bed Coronary Care unit.

Dedicated Cardiovascular Unit

Our dedicated 29 bed Cardiovascular Unit is staffed by specialist nurses who care for patients pre and post cath lab and surgical procedures. Medical management is provided for conditions including chest pain, heart failure, respiratory conditions and arrhythmias.

Physiotherapy Support

Patients receive a full range of comprehensive physiotherapy services to ensure optimal surgical outcomes are achieved. Physiotherapy support begins in the cardiac and thoracic pre-admission clinic and continues post-operatively on the first day in the ICU. Early participation in prescribed postoperative exercise programs is an integral component of our rapid recovery protocol, allowing for earlier and greater mobility.
